

# Driving innovation for our members: strategic priorities

All of Biovia's future events, activities and collaborations will relate to our strategic priorities, identified by our members in interactive workshops held throughout 2025

## Innovation focus:

### Value-based healthcare: New business & care models

Preparing for a transition from activity-based to value-based

### Clinical trials

Fast track to Phase 1 and multi-center trials in Europe

### Immunology-driven precision therapies

Showcasing Flanders' expertise in ATMP, antibodies and radioligands, using this pioneer position to build global collaborations

### Biovia Expertise Center: Faster path to market

Validating and implementing technology

### Dual use

Adapting existing or creating new healthtech and biotech products that could also be applied in a defense setting

### TechBio / Personalized Medicine

Integrating pre-clinical drug discovery with diagnostics, biomarkers and digital tools to enable truly personalized medicine

### Agtech & industrial biotech

Translating sustainable, bio-based innovations, in connection with human health, from lab to field to factory

## Network focus:

### Strengthen collaboration with SPCs & other networks

Establish an inter-cluster roadmap and expand funding opportunities

### Tailored funding instruments

Improve the funding landscape for innovative projects with societal impact

### Build sufficient & competent talent

Support and strengthen new and ongoing initiatives to address the shortage of skilled labor in the life sciences

### Attract & grow international companies

Ensure that regional strengths are clear to international companies and that homegrown companies get sufficient exposure and support

### Partner with top EU clusters

Expand structured partnerships with clusters in key regions, creating a "champions league" of innovative clusters
